## **Renewable Energy Group, Inc. plans for office relocation**

*Leading biodiesel company announces plans to move corporate offices to  
Des Moines/Ames labor market*

(Ralston, Iowa, April 6, 2007) – Renewable Energy Group (REG), Inc., a biodiesel industry leader, today announced plans to move its corporate offices from Ralston, Iowa, to a location in the central Iowa corridor, to accommodate growth, strengthen recruitment, and improve operational efficiency.

Renewable Energy Group, Inc. is investigating several central Iowa locations, one of which is Ames. REG is working with the Ames Chamber of Commerce and Ames Economic Development Commission, as well as the Iowa Department of Economic Development, to determine development of a relocation plan.

““This project dovetails exceptionally well with what we as a community are trying to attract,” said Dan Culhane, President and CEO of the Ames Chamber of Commerce and Ames Economic Development Commission. “Couple this with the efforts of Iowa State University and their commitment to Biofuels and REG is locating in what we hope will eventually become the obvious choice for renewable fuels research, development, and investment.”

The move would bring more than 40 current professionals and skilled employees to the Ames area with the creation of additional positions in coming months and years.

“Renewable Energy Group, Inc. has been great to work with and we are excited that they are considering Ames as the location for their expansion,” Culhane.

Renewable Energy Group, Inc. plans to maintain a presence in Ralston through current shared services agreements with West Central. The biodiesel production facility in Ralston, which is owned by Renewable Energy Group, Inc. and employs 15 people, will remain in full operation.
